ABOUT ME

I am a passionate and detail-oriented Flutter Developer with a solid foundation in cross-platform mobile application development. For me, coding is more than just a career—it's a hobby that inspires creativity and continuous learning. I enjoy turning ideas into functional and visually appealing apps, often exploring new tools and features in my personal time.

Proficient in Dart, UI/UX design principles, Firebase integration, Google Maps, and RESTful APIs, I strive to build smooth and user-friendly mobile experiences. I am eager to apply my skills, contribute to innovative projects, and grow professionally within a collaborative and forward-thinking development team.

EDUCATION

2020- 2023	Bachelor of Science in information technology	Saraswati Collage ,Dhoraji
2023 - 2025	Master of Science in information technology	Harivandana collage, Rajkot

SKILL

- Flutter, Dart, Firebase, REST APIs (http, Dio)
- UI/UX Design, Animations, Navigation, State Management (Provider, GetX)
- Local Storage (SharedPreferences, SQLite), Firebase Auth & Cloud Messaging
- App Lifecycle, Background Tasks, Device Integration (Camera, Location, Maps)
- GitHub Projects, Clean Architecture, Payment Integration, Flutter Web/Desktop

EXPERIENCE

Flutter App Development

MDIDM INFOWAY | Rajkot, Gujarat

- Completed hands-on training focused on real-world Flutter app development.
- Developed multiple functional apps from UI to deployment during the program.
- Applied state management, API integration, and Firebase in practical projects.
- Understood app lifecycle, storage handling, and deployment to Play Store.
- Collaborated on client-based capstone projects simulating industry workflows.

PROJECTS

LPBH Amreli – Business Hub App

Flutter | REST API | SharedPreferences

- Developed a full-featured business listing platform to connect and promote verified local businesses in the Leuva Patel Business Hub, Amreli.
- Implemented secure user authentication, API-based workflow approvals, and persistent local storage using SharedPreferences.
- Designed a responsive, intuitive interface enabling business owners to easily manage and update their listings.
- Ensured smooth and continuous data exchange between client and server to enhance user experience and engagement.

Detroja Samaj – Community Management App

Flutter | REST API | SharedPreferences

- Built a community platform for Detroja Samaj integrating data of families, villages, and members.
- Designed dynamic data modules with structured information flow for villages, members, and achievers (“Tejasvi Tarla” section).
- Added cultural and informational modules such as Samaj History and Aarti to preserve community identity.
- Delivered a secure, user-friendly experience with REST APIs and efficient local session management.

Local Business Management System

Flutter | SQLite | PDF Generation

- Created an offline-first business management system for small enterprises to handle partners, stock, billing, and finance.
- Integrated credit/debit tracking, real-time stock updates, and automatic PDF invoice generation.
- Optimized local SQLite architecture for fast, reliable, and stable offline operations.
- Focused on usability and accuracy to simplify daily business operations effectively.

Soft Skills

- **Detail-Oriented & Creative:** Builds clean, efficient, and visually appealing Flutter apps.
- **Problem Solving & Teamwork:** Works well in teams and enjoys finding smart solutions.
- **Time Management & Adaptability:** Handles multiple tasks and learns new tools quickly.
- **Communication:** Keeps clear, positive communication with clients and teammates.
- **Continuous Learning:** Always eager to explore new Flutter trends and improve skills.
